Sol	Prime factors of a positive integer are the prime numbers that divide that integer exactly.	
3882300	Given an array arr of n integers and a positive integer num.	OA3BR23
	Let's suppose prime factorization of num is: $p^a x q^b x r^c x \dots x z^f$, where p,q,rz are prime numbers.	0430
OA	Sum of numbers in array arr at indices of prime factors of number num is: a x arr[p] + b x arr[q] + c x arr[r] + + f x arr[z].	
3CD00A	You are given an array arr of size n and a positive integer num. You are required to calculate the sum of numbers in arr as mentioned above, and print the same.	8823000
22	Note:	
00A3BR2	 If arr is empty, print -1. If prime factor of num not found as indices, print 0. 	,cDood 35
~(Input Format:	5
8823CD	The input consists of three lines:	2
3*	 The first line contains an integer, i.e. n. The second line contains an array arr of length of n. The third line contains an integer num 	,043BR23
,3CD00A	The input will be read from the STDIN by the candidates.	COC
	Output Format:	BRZZ
38P	Print the sum that was mentioned in the problem statement.	
,	Example:	3CD0043
	Input:	3000
	6	
	11 21 32 45 1 23	3822
	6	Box 300 Color
	Output:	- Cd
	77	Sept. Town

Explanation:

```
6=2^{1} \times 3^{1}
sum=1*arr[2]+1*arr[3]=1*32+1*45=77
```
